Insight for SAP

Expert services for SAP software and technology solutions

Businesses require the right applications to achieve their goals, whether that's operating more efficiently, driving service quality improvements, or developing industry-changing innovations. Today, more than 430,000 organizations and 200 million users rely on SAP® solutions to help them do what they do, better.[1]
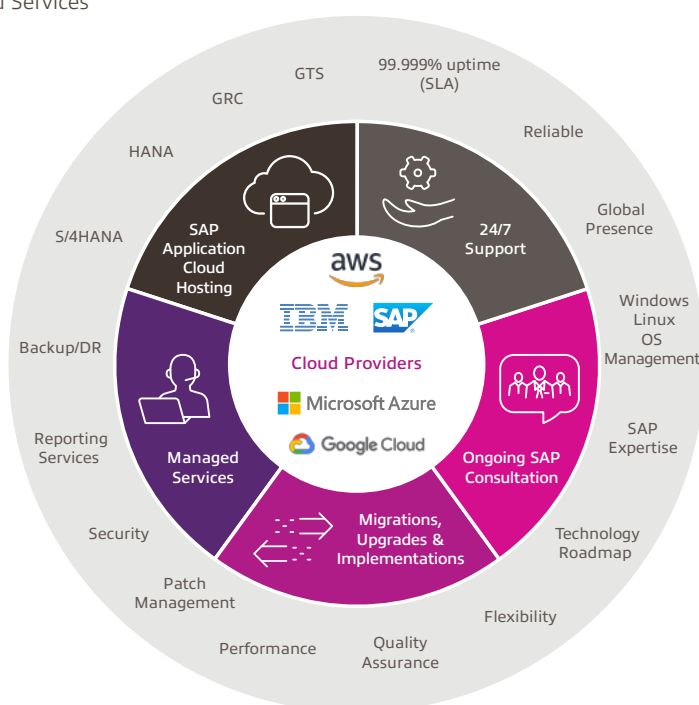

Insight has the expertise and certifications your business needs to implement and manage SAP applications with success. We can provide specialized SAP services at any stage.

We support:

- Greenfield SAP deployments
- Migrations to SAP solutions
- Upgrades to SAP OS, HANA®, and/or database
- Disaster recovery/high availability projects involving SAP solutions
- TDI compliance and validation
- SAP solution optimization through Managed Services

Key benefits:

- Maximize your SAP investments
- Minimize changeover/integration challenges
- Drive faster time-to-value
- Ensure SAP solution performance
- Support productivity, collaboration, and service delivery

Service portfolio

SAP HANA® Appliance Deployment
We provide one SAP HANA instance, containing up to two SAP HANA tenants. Installations may include firmware and/or OS upgrades. Service includes a readiness check, design and planning, SAP HANA database deployment, documentation, project management, and SAP HANA validation.

Operating System Upgrade
We provide an OS upgrade to SAP HANA, which includes a readiness check and remediation of system settings, backups, and patching. Service covers design and planning, production HANA host upgrades, documentation, project management, and testing.

SAP HANA System Replication
We provide one SAP HANA High Availability instance, containing two SAP HANA instances connected via SAP HANA system replication (HSR). Installations may include firmware and/or OS upgrades. Service includes a readiness check, design and planning, SAP HANA system replication, validation and testing, documentation, and project management.

SAP HANA System Replication and OS Clustering
We provide one SAP HANA High Availability instance, containing two SAP HANA instances connected via OS clustering and SAP HSR. Installations may include firmware and/or OS upgrades. Service includes a readiness check, design and planning, Linux® OS Clustering deployment, SAP HANA system replication, validation and testing, documentation, and project management.

SAP HANA Tailored Data Center Integration (TDI)
We provide one SAP HANA instance, containing up to five SAP HANA tenants. Installations may include firmware and/or OS upgrades. Service includes a readiness check, design and planning, SAP HANA database deployment, documentation, project management, and validation.

SAP to Azure
We help you transition on-premises editions of SAP® applications to the Microsoft® Azure® cloud using best practices and proven reference architectures.

Managed Services for SAP
Let us support and maintain your SAP landscape. Gain full transparency of our operations and your environment via our client portal. Service includes all SAP system refreshes, Enhancement Pack upgrades, Unicode migrations, application server installations, architecture design and analysis, technical HANA migration, project management, and disaster recovery planning.

Driving innovation with digital transformation

At Insight, we help clients enable innovation with an approach that spans people, processes, and technologies. We believe the best path to digital transformation is integrative, responsive, and proactively aligned to industry demands. Our client-focused approach delivers best-fit solutions across a scope of services, including the modern workplace, modern applications, modern infrastructures, the intelligent edge, cybersecurity, and data and AI.
