How to Gain Visibility and Control Across Your Security Environment

IT security teams are often expected to monitor multiple portals and alert systems. This approach is cumbersome and fails to provide singular visibility and control of the IT environment from a security perspective. Learn about important trends in IT security — and a groundbreaking solution that lets you secure in wholly new ways.

Surveying the landscape
We're seeing an increase in cybercrime costs, data volumes, device counts — and in businesses asking for help.

The pressure is on.
IT security leaders face a number of challenges securing the data center, the corporate office, email systems, and everywhere in between. The pressure is on.

- Data aggregation
- Correlation
- Alerting
- Dashboards
- Compliance
- Retention
- Forensic analysis

• Scalable and evergreen
• Consolidates tools required to run an SOC
• Reduces overall security costs
• Eliminates the need for hardware or virtual machines
• Enhances or replaces existing security tools
