

DevOps Strategy Workshop

Business challenge

Digital disruption is rapidly changing the business landscape. To remain competitive, organizations must become nimble and innovative in order to deliver value faster and more frequently to customers — and DevOps is critical to that goal.

DevOps enables IT teams to accelerate time to market with higher quality and increased reliability. However, many organizations follow the wrong approach, miss critical aspects of organizational and cultural change, or revert to their legacy practices over time.

How we help

Our two-day DevOps Strategy Workshop walks your team through a broad range of topics in a very short timeframe to both educate your team and understand your organization. The goal is to identify a list of recommended action items that will be most impactful for your transformation and to discuss the foundation of an optimal strategy to achieve those outcomes.

Who should attend

Attendees should have a solid understanding of the organization and its business, customers, culture, people, technology and practices, as well as knowledge and expertise in Agile and DevOps (or a strong interest in learning). The following attendees are recommended:

- Relevant senior leadership (CTO, CIO, directors)
- Client's DevOps transformation team, which may include transformation leads, line of business leads and technology team leads
- Leaders who are familiar with the company's strategic goals, as well as any pain points that are hindering its ability to achieve those goals

Duration

2 days

Benefits

- Devise a **go-forward plan** for your DevOps transformation.
- Get **guidance** for building your transformation team.
- Receive a **recommended list** of workstream improvements to focus on.

Workshop topics

Insight technical experts will cover the following topics with your team throughout this workshop:

- Overview of DevOps fundamentals
- Targeted discovery Q&A
- Review competitive landscape, business goals, current state, pain points and desired state
- High-level value stream mapping and listing of candidate value streams for first iteration
- Transformation team formation
- DevOps transformation approach
- Develop workstreams and next steps
- Value stream mapping documents

Deliverables

After working with your team and gaining an understanding of your organization, we will follow up with specific items to help guide you on your DevOps transformation journey:

- High-level DevOps strategy presentation with findings and recommendations
- Proposed value stream selection
- Initial prioritized list of changes to target across people, processes and products
- Starter coaching plan and agreements
- High-level roadmap and timeline for first iteration
- Proposal for future engagement and partnership
