

FORGING YOUR PATH TO MODERNIZATION

How to make endpoint management simpler, cost-effective and more secure

In modern workplaces, it's common to see IT ecosystems with many device types from several OEMs. Managing these environments can be complex. And as devices proliferate, that complexity will grow.

Multiple device types
More than 75% of remote workers use two or more devices for work.

Administrative resource constraints
36 hours monthly is how much time IT spends on endpoint security monitoring.

Increased security risk
34% of organizations say they lack visibility into endpoint activities.

Multiple tool complexity
Several tools are often needed to monitor compliance and endpoint activity.

Modern device management challenges

A call to business leaders

Endpoint management challenges may stand in the way of meeting critical business priorities.

Top three priorities of CEOs in 2022

secure data and systems

40%

improve data transparency

Enter: Unified Endpoint Management

Device-specific management solutions are costly and inefficient. Many organizations are looking to Unified Endpoint Management (UEM) software as a solution. UEM unites features from multiple OEMs in one interface, making management much simpler.

5 benefits of using UEM software

- Improved and comprehensive endpoint visibility
- Reduced IT management costs
- Single-click device updates
- Applying security policies to connected devices
- Secure adaptation of Bring Your Own Device (BYOD) policies

Strategic adoption: Key considerations

- Securing** the upfront capital
- Recruiting** the right resources for implementation
- Maintaining** staff for administration and support
- Scaling** up or down with business changes

Make endpoint management easy.

Modernize and maintain with minimal internal effort.

Managed Endpoint delivers an effortless approach to administration and support of new or existing endpoint management platforms.

- Support for every platform**
 - ✓ Windows®
 - ✓ Windows 365™ virtual PC
 - ✓ Mac®
 - ✓ iOS®
 - ✓ Android
- Service features for every need**
 - ✓ Evaluation
 - ✓ Configuration
 - ✓ Implementation
 - ✓ Administration
 - ✓ Migration
 - ✓ Support
 - ✓ Reporting
- Security built in**
 - ✓ 24/7 administration and alerting
 - ✓ Management of users, groups, endpoints and policies
- Simpler cost structure**
 - ✓ With per-device monthly billing
- Strategic realignment**
 - ✓ Performance measured against specific targets
 - ✓ Resources freed for more strategic initiatives

Partners in modern work

Managed Endpoint from Insight leverages deep partnership with industry-leading UEM platform providers to guarantee an endpoint management experience that meets your unique needs.

Adopt a modern, cost-effective and hands-off approach with comprehensive administration services **contact us.**
