Security Services

Mitigate risk and protect your organization.

With rapid growth in endpoints, data volumes, cloud, and the overall complexity of the data center, security isn’t easy. Organizations have to evaluate the amount of protection they need based on their environment, budget, and the level of risk they can safely assume. Simply wanting as much security as possible is understandable — but unrealistic.

An advanced approach

When you design your security program, you begin with policy. Various policies address the cloud, the data center, endpoints, mobile use, and the network. Point products are acquired to support each area. The result, however, is often an unIntegrated patchwork without a holistic and encompassing strategy.

Insight has a robust security practice and the pulse on the IT security landscape. We have helped organizations secure their data and networks for more than 30 years. As a group of advisors, solution providers, and technical specialists, we maintain certification and immersion in the latest security technologies and best practices.

Our Security Services consultants can help you consider the security implications of your business activities and adopt solutions that are aligned with your needs and objectives. We begin by assessing your current environment, challenges, and requirements.

Common challenges:

- Multiple security solutions that don’t integrate and drain IT resources
- Unclear or incomplete data strategies that don’t address data privacy regulations
- Staff or knowledge gaps that result in security vulnerabilities
- Wanting to adopt new technologies, platforms, or data-intensive models while taking the right security measures
- Preparing for or recovering from a security event
- Securing buy-in from leadership to invest in more security infrastructure

Our premise:

- Technology alone will not fix problems; poorly implemented technology makes things worse.
- A comprehensive governance model with a clear vision can go a long way toward better security.
- Security and the IT organization can be business enablers.
- Data is valuable — it is also a risk. Make data decisions wisely.
Driving innovation with
digital transformation

At Insight, we help clients enable innovation with an approach that spans people, processes, and technologies. We believe the best path to digital transformation is integrative, responsive, and proactively aligned to industry demands. Our client-focused approach delivers best-fit solutions across a scope of services, including the modern workplace, modern applications, modern infrastructures, the intelligent edge, cybersecurity, and data and AI.
