

Solution Brief

Why Insight for Devices?

Drive value throughout the device lifecycle.

Devices are instrumental to business operations. They empower communication, collaboration and productivity. They enable businesses to be competitive, strategic and innovative. No business could really do business without devices — billions are in use today.

However, challenges abound. It's difficult to procure and maintain a functional fleet of devices. Managing multiple vendors requires time and resources. Meeting user needs is an ongoing demand. Keeping up with refresh cycles and asset management can get complicated, fast.

Support for the complete device lifecycle

Insight has a different vision — simplified, full device lifecycle support, all from a single partner. We know that anyone can sell you a laptop or tablet. We offer more, helping you maximize value and continually improve your device ecosystem.

Partner with Insight to:

Ensure maximum uptime and device lifespans.

Bring device choices to employees without adding complexity.

Eliminate the time and hassle of managing multiple vendors.

Improve the end-user experience, from refresh to support.

Drive down device costs and employ modern management.

Why Insight

As a global systems integrator with deep relationships with all major technology partners, Insight is able to offer you flexible device options. Whether you enable employee choice or use corporate standards, you can maximize control of your fleet to ensure optimal cost and performance outcomes.

Benefits

- + Drive efficiencies with a single device partner.
- + Scale or change device strategies with ease.
- + Lower total cost of ownership of devices.
- + Introduce an employee choice program.
- + Fulfill device needs quickly and securely.

Our partners

Related services

- + Device as a Service (DaaS)
