

Insight Connected Platform for Detection and Prevention

Leveraging the Internet of Things (IoT) and Artificial Intelligence (AI) to improve health and safety in businesses and public spaces

A new frontier

From safety gear to surveillance systems, modern organizations have long answered the call to protect the health and wellbeing of their employees and customers. But when it comes to preventing the spread of disease, minimizing risk can be a challenge — particularly for those in the hospitality, healthcare, entertainment, restaurant, retail and corporate office space.

Without a robust preventive strategy in place, declines in consumer activity or employee productivity can have serious economic repercussions.

Rising to this modern challenge requires a modern solution.

How we help

Insight Connected Platform™ provides a flexible, scalable foundation for building smarter, safer spaces. By unifying data from a wide range of devices, sensors and systems into a single dashboard, this robust Internet of Things (IoT) framework helps organizations achieve the real-time visibility required to detect symptoms and prevent the spread of disease.

- Thermal cameras for contactless temperature detection
- The Daily Q health self-assessment questionnaire
- Bluetooth® Low Energy (BLE) contact tracing solutions

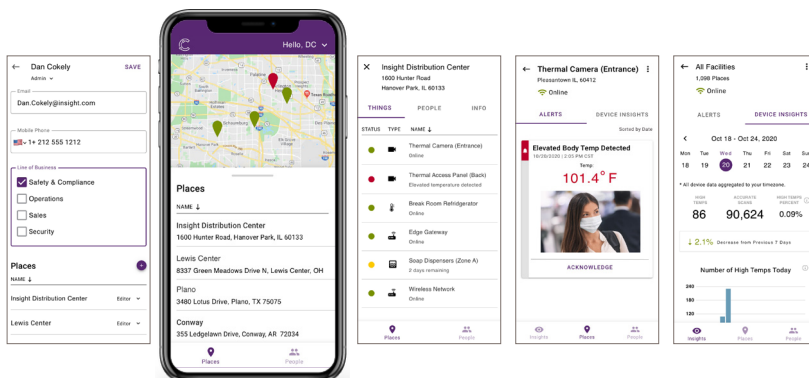

Key use cases

Leverage Connected Platform to securely manage:

- Thermal cameras
- The Daily Q health assessment
- Secure contact tracing solutions

Benefits

- **Build a smarter, safer strategy** for getting back to business.
- **Prioritize the health and privacy** of your employees and visitors.
- **Gain the visibility** to detect symptoms and prevent the spread of disease.
- **Initiate secure alerts** and customize response workflows.
- **Manage data to gain new insights** and drive decision-making.

Connected Platform use cases

Through our deep IoT, data and AI capabilities and extensive industry partnerships, Insight Connected Platform is transforming businesses and public spaces.

A customizable, user-friendly app makes it easy to manage users, monitor sites and sensors, generate baseline reports and build alert workflows. Continuous data capture and storage enable ongoing system improvement and historical reporting.

- **Detect**

- **Contactless temperature detection**

- Using best-in-class thermal imaging cameras, Connected Platform enables your organization to evaluate and receive alerts on elevated human temperatures in individual and group settings —accurately and discreetly.

- **Prevent**

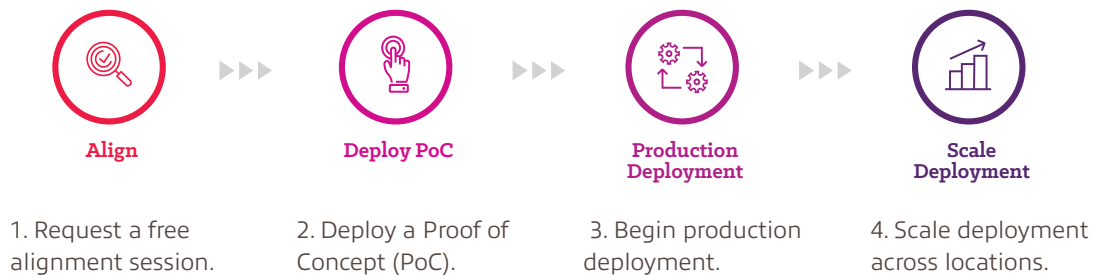

- **The Daily Q health assessment**

- This secure, app-based solution is easy to share with both employees and visitors, using just a few basic questions help users determine whether they can safely head into your place of business, or whether they may need to stay home.

- **Contact Tracing Solutions**

- Designed with privacy, security and simplicity in mind, Insight's Contact Tracing Solutions bring together Microshare® BLE wearables, wave scanners and LoRaWAN® gateways to empower your organization to quickly notify affected parties in the event of a reported case.

Our process: A repeatable, enterprise-wide deployment model

The value of a super solution integrator

As a Super Solution Integrator (SSI), Insight provides the end-to-end capabilities and extensive partnerships required to tackle these initiatives at scale — all under one roof. Leveraging our expertise across Digital Innovation, Cloud + Data Center Transformation, Connected Workforce and Supply Chain Optimization, we provide a uniquely streamlined, holistic approach to IT transformation that eliminates siloes and accelerates time to value.

From strategy and design, to procurement, deployment, integration, management and more, we bring people and technologies together to deliver comprehensive solutions that drive stronger business outcomes.
