Solution Brief

Cisco SecureX

Simplified security from Insight and Cisco

Business challenge

Security is nonnegotiable, but maintaining a proactive, protected security environment has become nearly unmanageable for many organizations. Legacy technologies, lack of automation and orchestration, gaps in skill sets, and disparate vendors and tool sets result in overwork and underperformance — leaving operations vulnerable to attack.

Our solution

Achieve simplicity, visibility, and efficiency with Cisco® SecureX™ delivered by Insight. Cisco SecureX is a cloud-native platform that connects Cisco's integrated security portfolio with your infrastructure, taking you from a series of disjointed solutions into a fully integrated ecosystem that enables intelligence sharing and coordinated response — preventing threats from bypassing overwhelmed security teams.

Turning on Cisco SecureX is a simple process with the potential to transform the efficacy of your security organization through orchestration and automation, visibility, integration, and more.

- Centralize context across tools and teams.
- Accelerate detection and response with visibility.
- Multiply security investments with full integration.
- Automate response playbooks and workflows.

Your strategic Cisco partner

As a solutions integrator, Insight leans on a 20+-year partnership with Cisco and deep expertise across the Cisco portfolio. When you partner with Insight for Cisco SecureX implementation, we'll help drive more strategic solution adoption for lasting success. Lean on our experts to:

- Identify security processes for improvement.
- Validate solutions, workflows, and tool sets.
- Educate users and teams for improved success rates.
- Support implementation and process change.
- Track performance to ensure optimal results.

Benefits

+ Increase security with purpose-built infrastructure.
+ Improve efficiency and user experiences.
+ Enhance visibility to make more informed decisions.
+ Drive more effective detection and response.
+ Free up resources to focus on strategic initiatives.

Cisco SecureX features

Rather than simply adding a layer of security, Cisco SecureX is embedded into every Cisco Secure technology. Its integration capabilities allow you to improve cross-functional collaboration and simplify the security experience by incorporating key teams and addressing the entire scope of security — not just operations.

Integrations
Simplify your existing ecosystem with an integrated and open platform that works with third-party solutions.

Orchestration
Automate routine tasks with prebuilt workflows, or build your own with a no-to-low code, drag-and-drop canvas.

Threat response
Accelerate investigations and incident response by aggregating and correlating intelligence in one view.

Device insights
Get a comprehensive device inventory with contextual awareness for identifying gaps in coverage.

Unified visibility
Experience simplicity with a customizable dashboard that includes operational metrics, emerging threat visibility, and access to new products.

Ribbon and single sign-on
Use the dashboard ribbon for access to SecureX features. Share and maintain context around incidents in one location with single sign-on.
