

Our Services Portfolio

Supporting your business throughout transformation

Organizations with legacy technologies and processes simply cannot keep up with the brisk pace of business today. Modernization has become mission-critical — and the only real way to navigate workforce demands, data growth, application development requirements, security threats, and the evergreen need to compete effectively.

Modernization requires:

- Technical debt reduction
- Integration of new technologies and platforms
- Cultural change
- New operational and organizational models
- Updated governance models and processes

Businesses that use IT strategically for digital transformation will experience:

- Greater agility
- Higher productivity
- Increased resilience
- Improved customer engagement

Finding experienced partners is crucial to your success. With a complete portfolio of services and a deep bench of expertise, Insight can be the resource you rely on to plan, implement, and manage technology-based change across your organization.

Why come to us

We're there for our clients through a variety of needs and challenges, including:

M&A or other organizational changes that require new, cost-effective data center solutions

Corporate-led hybrid strategies that compel migration and consolidation events and workload-platform alignment

Security incidents that need investigation and proper remediation

Modernization requirements driven by inefficiencies, cost challenges, risk levels, and much more

Overwhelmed or underqualified IT teams that benefit from ongoing services and/or resources from a partner group

At a glance

5,000 technical resources

25+ years

of data center experience

300+ individual service offerings

~35,000

critical enterprise infrastructure components monitored

>1EB of data and

>2M workloads migrated since 2015

\$1.5B cost savings identified for clients

1,000+ OneCall clients
