

Managed Collaboration for Microsoft Teams Voice

Business challenge

The impacts of remote and hybrid work environments have made seamless, always-available tools for collaboration necessary for doing business. Microsoft Teams® Voice provides end users with everything they need for a seamless experience in one familiar platform. However, this presents challenges for IT organizations unfamiliar with managing voice in the cloud, such as limited visibility into calling environments and gaps in knowledge related to requirements in your Microsoft 365™ environment.

Our solution

Insight's Managed Collaboration for Microsoft Teams Voice provides clients with services to manage and gain visibility into their entire environment. This offering enables your organization to:

- Leverage a single platform for integrated calling, meeting and team collaboration, including multivendor environments.
- Benefit from administrative support for a hands-off approach to managing Teams Voice.
- Take advantage of analytics and monitoring that drive a better and more engaged user experience.

What's included:

- Advanced call analytics, dashboards, custom reporting and call monitoring powered by Vyopta
- 24/7/365 admin-to-admin application and device support
- Service delivery management and ongoing roadmap and technical advisory assistance
- End-user Move, Add, Change, Disconnect (MACD) requests
- Advanced change requests (e.g., dial plan, call routing)
- 24/7/365 cloud-based infrastructure incident management
- Expedited escalation to Software as a Service (SaaS) vendor support

Managed Collaboration for Teams Voice also gives you access to optional service add-ons, including:

- Managed SBC/direct routing
- PSTN calling plan
- Teams adoption services
- Managed Teams rooms
- Mass notification
- Enhanced 911 management

Benefits

- Gain visibility into your entire environment.
- Easily manage Microsoft Teams Voice.
- Ensure support for an evolved Microsoft Teams environment.
- Maximize the ROI of your Microsoft Teams investment.
