

Microsoft Threat Protection Workshop

Realize the benefits of Microsoft's next-generation security tools.

Business challenge

Do you know how many phishing attacks your organization has received? Are your employees using the right password protocol? The growing threat of ransomware and other cybersecurity threats and the transition to hybrid work have made enterprise security more complex than ever. IT staff today must manage a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Cloud security and data exposure can further increase risks.

Our solution

The Threat Protection Workshop from Insight can help you achieve your broader security objectives — and identify current and real threats — to develop a strategic plan that's customized for your organization and based on the recommendations of cybersecurity experts.

Our workshop will help you gain visibility into immediate threats across email, identity and data, and provide clarity and support on how to upgrade your security posture for the long term.

During the workshop, you'll learn how to:

- Review your security goals and objectives.
- Identify real threats in your cloud environment with Threat Check.
- Map identified threats to specific solution recommendations.
- Develop joint plans and next steps.
