Secure, scalable, remote access to the applications workers need

Virtual Desktop Infrastructure (VDI) solutions from Citrix and Insight deliver secure virtual desktops and apps to end users, allowing workers to get the job done without coming into the office.

60% of employees report working on virtual collaboration tools.

Even so, traditional on-premises VDI requires costly infrastructure and high-end hardware.

Citrix enables this cloud-first environment to be both efficient and secure.

155% of IT budget will be spent on productivity in the future work setting.

In fact, VDI is in critical demand for the global virtual app markets to grow to $5 billion by 2022.

Cloud VDI is great...

Create a modern remote environment with managed VDI.

Provide a consistent, secure experience for all end users.

Minimize existing environment with flexible, scalable, cloud-based solutions.

... but does your organization have the skills and resources to

1. Support cloud infrastructure and modern VDI management tools?
2. Keep up with changes to ensure secure authentication and access to VDI?
3. Monitor remote users, performance, and sizing?
4. Perform ongoing maintenance, application delivery and feature changes?

Introducing Managed VDI from Insight

Insight Managed VDI takes the challenges out of maintaining your critical environment by offering:

- Fast and portal-less management for Anywhere Virtual Desktops (AVD) and Citrix environments.
- User management, tools, and application activation and deployment of virtual machines.
- Application delivery.
- User experience monitoring.
- Automated processes.

How Managed VDI improves your organization's bottom line:

- Reduce IT costs with flexible cloud pricing while optimizing your existing infrastructure and cloud investments.
- Reduce time to deploy and manage remote work.
- Secure remote work for your distributed workforce.
- Drive business outcomes with managed business solutions.
- Optimize your IT infrastructure for improved performance and better application management.

So learn how Insight’s Managed VDI provides end users with a secure, secure access to your critical applications without the cost of managed VDI, improving your bottom line, get in touch with an expert.
