

Virtual Reality Fast Start

Accelerate your initiative

Business challenge

The limitations of the real world can sometimes fall short of meeting the needs of your employees. Access to local facilities, a dispersed workforce and time constraints can all be limiting factors within any workplace today. Virtual reality can elevate your business by bridging the gap between what's available and what's possible.

How we help

With Insight's Virtual Reality Fast Start, you're empowered to explore, develop and prove a Virtual Reality (VR) solution to solve your business challenges — quickly. By leveraging our team of VR experts, and the power of the latest in VR headsets, we'll tackle your greatest business challenges together.

Common use cases for VR include technical training, empathy training, brand engagement, emotional experiences and more. You'll also benefit from our vast experience in a wide range of industries — including manufacturing, healthcare, government and military, energy and utilities, and more — granting us deep insight into the VR landscape.

Preparing for transformation

This Fast Start is designed to help you integrate VR into your work processes quickly and effectively. No prior knowledge or experience in VR is required.

Duration

4–6 weeks

Benefits

- Expanded knowledge in the VR market
- Best-in-class virtual reality development
- Functional and presentable product

Our proven process

Spark design brief	Concept preview	Development	Beta delivery
Before the engagement begins, we'll collaborate in a Spark session to explore and define your use case. We'll also refine the scope of work and define features, small concept art and more.	During the first week, our design team will merge your brand and the scope of work into concept art. You'll get a detailed preview of what the final product will look like and how it will behave.	Our developers apply Agile methodologies and deliver builds to you on a weekly or biweekly basis. This allows adjustments to be made as we deliver toward your goal.	Experience a high quality, functional application that is developed with high level features in mind. Use this deliverable to showcase capability and move forward to a larger build out.

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
