

Microsoft Intune and Azure AD Autopilot JumpStart

Business challenge

Provisioning, managing and securing endpoints for the “anywhere” workforce can be complex. Our commercial clients often have their hands full when it comes to managing their day-to-day business, let alone working through the complex world of cloud services. They may have older legacy platforms, privacy concerns, or could be dealing with industry regulations.

Our Microsoft Intune® and Azure® AD Autopilot JumpStart service is a combination of hands-on training and design with deployment of fundamental components. This service is designed to help you leverage Intune as a production-ready solution.

Our solution

Insight's JumpStart program provides expert-led, one-on-one workshops that combine training and implementation. Centered around best practices for cloud and security, JumpStart familiarizes your team with your new technologies and provides you with a working environment that can be used right away.

Additional Info

- Our Microsoft technical experts show you the features and functionality, focusing on how to deploy, implement and operationalize the solution.
- Through whiteboarding sessions, we design your implementation based on current and future requirements as well as security best practices.
- We'll establish identity and collaboration frameworks via configuration of Azure® Active Directory.

Insight is one of only 60
Azure Expert MSPs globally.

More than 2,000 Azure-focused
engineers on our teams.

We passed a rigorous
certification and audit process.

Benefits

- Eliminate OS image re-engineering
- Self-deploy off-the-shelf devices
- Manage updates
- Provide remote assistance
- Proactively monitor devices
