

Secure Networking for Healthcare, Education, and Business Continuity Across All Industries

Overcome today's challenges with targeted solutions.

Today's rapidly changing environment has shifted operating models almost overnight. Organizations must expedite the adoption of technologies that modernize infrastructure, implement new processes and tools, and secure new endpoints to support a growing remote workforce. The most immediate changes have been within education and healthcare, though many types of organizations need a plan for business continuity.

With more than 30 years of experience and hundreds of certifications from top technology partners, Insight Cloud + Data Center Transformation (CDCT) can help architect and secure your next-generation network to meet new demands.

Challenges Insight CDCT can address:

Rapid network expansion to support pop-up locations, triage, and testing

Bandwidth and security policy requirements for online education models

Limited capacity of VPN user connections and firewall sizing

Increased security threats due to lacking security controls within remote work scenarios

Temporary wireless needs for healthcare triage, mobile testing, and K-12 education

Additional network visibility, endpoint security, web security, secure access solutions (VPN, VDI), or other office extend technologies

Why Insight

1,500+ services professionals

3,000+ technical certifications

Deep expertise in data center and IT service delivery

Strategic partnerships with all major technology providers

300+ network projects per year

>800 customers serviced

Offerings and capabilities

Healthcare

The medical community has an immediate need for secure, rapidly deployable networking solutions for mobile testing centers and temporary hospital facilities. Responsiveness and agility are of the essence during critical times, but changes need to be made with a keen eye toward security and compliance.

Get support with:

- HIPAA-compliant solutions
- Flexible network architectures
- Wi-Fi assessment, design, and deployment
- Point-to-point bridging
- Cellular LTE (backhaul)
- Outdoor Wi-Fi/hotspots
- Security (firewall, cloud, endpoint)

Education

State, federal, and health agency guidelines have made it essential to reframe and reformat the educational experience without sacrificing quality, and are leaving it to education facilities to determine the most effective model.

We can help with:

- Wi-Fi assessment, design, and deployment
- Point-to-point bridging
- Outdoor Wi-Fi/hotspots
- Security (firewall, cloud, endpoint)
- Cloud adoption services

Business continuity across all verticals

Most industries are facing disruption and need to plan for business continuity. The rapidly expanding remote workforce has placed new demands on networks, cloud, security frameworks, and the IT teams that support them.

Get assistance with:

- Virtual collaboration platforms (voice, video, IM)
- Remote access solutions
- VPN (new or expansion/optimization)
- Virtual Desktop Infrastructure (VDI)
- Endpoint security
- Office extend technologies
- Network access control, identity and access management
- Security and Governance, Risk, and Compliance (GRC) programs
- Cloud adoption services
 - Migration and consolidation
 - Workload alignment
 - Cloud on-ramp for SaaS and IaaS
 - Storage and data protection
 - Cloud cost optimization
 - Managed cloud services
- Next-Gen Firewalls (NGFW), VPN, and SASE
- Endpoint security
- SD-WAN/WAN optimization

Meaningful solutions driving business outcomes

We help our clients modernize and secure critical platforms to transform IT. We believe data is a key driver, hybrid models are accelerators, and secure networks are well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.
