DevOps Transformation Service

Clearing the path to DevOps

Business challenge

Digital disruption is rapidly changing the business landscape. To remain competitive, organizations must become nimble and innovative to deliver value faster and more frequently to customers. For many companies, this means empowering IT to elevate business agility — and DevOps is the key.

DevOps enables IT teams to accelerate time to market with high quality and reliability. However, a thoughtful transition to a DevOps model is essential for business success.

Our solution

DevOps unifies people, processes, technology and culture to create multidisciplinary teams in order to reduce time-consuming handoffs between siloed teams. DevOps embraces Lean and Agile principles and practices, such as continuous improvement, working in small batches, limiting work in progress and iterative development.

At Insight, we help organizations succeed in DevOps transformations and build high-performance IT capabilities. Our DevOps Transformation Service is a comprehensive approach that unifies Organizational Change Management (OCM), Agile Practices and DevOps.

We leverage experts in product management, User Experience (UX), development, QA, security and operations to guide your organization through a successful DevOps transformation. Here are some of the things we bring to the table:

- Dedicated team of experts
- Premier member of Scrum.org
- Deep experience with DevOps adoption
- Proven transformation framework

Benefits

- Establish a **culture of trust** and **continuous improvement**
- Ability to **deliver value faster** and more frequently
- **Increased quality** of features and reliability of service
- **Improved ability** to compete and win with customers
